 - A. Press and hold for 2-3 seconds for the first time: Turn the GP-102+ on.
 - B. Press once: Next page
 - C. Press and hold for 2-3 seconds: Enter that page

Precautions

- Keep the GPS receiver away from children's reach. It contains small parts that may come off the unit and cause suffocation.
- Follow all safety regulations for electronic devices and turn off electrical devices or RF products when requested.
- This product uses a lithium battery. Keep away from fires and high temperatures.
- Improper disposal of waste equipment or battery may cause explosion.
- Dispose of or recycle the battery as instructed. Please call your local recycling centers for details.

Charging the Battery

It takes about two hours to charge the battery to full level. First, connect the mini-USB connector of the USB cable to the USB port on the GP-102+. Next, connect the end of the USB cable to an adaptor or the USB port of your PC or laptop. When charging is in progress, the charging indicator (blue) will always be illuminated. When the battery is full, the charging indicator will turn off. Then, remove the USB cable from the GP-102+.

Battery Warning

If you do not follow the instructions below, you may risk shortening the battery life and causing a fire, chemical burn, electrolyte leakage or other damage.

- Operating temperature: -20°C to 60°C (-4°F to 140°F)
Charging temperature: 0°C to 45°C (32°F to 113°F), using GP-102+
- Storage temperature: -10°C to 45°C (14°F ~ 113°F)

Charging Power Supply

To ensure safety, please charge your GP-102+ with the following power sources:

- Standard PC or laptop USB port.
- Car USB adaptor: Input 12V; Output 5.0V.
- Indoor USB adaptor: Input 110/220VAC; Output 5.0V.
